Please attach copies of any documentation that demonstrates consistent, historical use of water since the right was established. This may be included in your irrigation plan.

5. REMARKS AND OTHER RELEVANT INFORMATION:

<p>This application is only for a short term point of diversion change to move the existing surface diversion to an onsite well. The application for the permanent change is anticipated to take up to two years and the exiting point of diversion is located on United States Forest Service land. At the end of this year, December 31st, 2012; the permit to use this point of diversion will expire. Therefore it is immediately necessary to receive a temporary permit to allow the point of diversion to be moved on site, moving the entire right allocated in Claim No. 144891 of 5cfs.</p> <p>Note: The original water right listed the instantaneous water quantity as 0.50 cfs and the annual quantity as 100 Acre Feet. Then, in December of 2010 an amendment was filed by William Hottell (the previous owner) and subsequently approved by the Department of Ecology for an "Error in Quantity" (see enclosed water right documents). Mr. Hotell did not also request the annual quantity of 100 Acre Feet to be amended, however it is our understanding that is not an issue as most water rights from this timeframe did not even list what the annual quantity was, they only listed the cfs. The actual historical water quantity is 1,526.91 Acre Feet.</p>
